It was released as the first single from their second studio album Set The World On Fire. It was published in the UK on 1 January 2015. The track Andy, the band's vocalist, wrote a song based on the fallen angels of the Bible, first introduced by artist Richard Villa III, which is described as very grounded in biblical stories. He then wrote a poem about how the story of their lives could be equated. Music Video Recording The music video for the song Carolyn will be released, but after the band switched to a big record label, they started working on their second album and there was no time for that. The band moved to make a video while on tour, and the recording process was very fast. The Fallen Angels video was filmed in April 2011 and released on May 23, 2011 and directed by Nathan Cox. [2] Plot Video begins by showing Earth from space as meteorites release into it. Meteorites hit the ground of a ruined city as Jake Pitts, the guitarist, emerges from a pit on the ground, later appearing Christian Coma, the drummer, shortly after the band finds themselves playing the song amid the destruction, then Jinxx, another guitarist, then arrives at the same scene of destruction the band's bassist, Ashley Purdy, rides a motorcycle and crosses a column of smoke and debris. Before the chorus starts playing, Andy Biersack appears, vocals, and then all the band members gather on a mountain of ruins, and then the chorus begins and the band continues to play the song as they constantly drop meteorites behind them and destroy what's left of the city, so he continues the video until at the second moment they perform the choir, from the meadies left by the meteorite impact, other people begin to come out, with Gothic makeup very similar to that of the band, and among them a girl, who wears some wings, and more and more of these people who make a circle around the band begin to arrive while playing and shouting repeating the above what Andy says. We're screaming! We're yelling! So he finally finishes the song by zooming in on all the band members and then showing them all together again on the mountain of ruins.
